1. Claims 1-28 are presented for examination.
2. The rejections of claims 10 and 19 under 35 U.S.C. § 112 have been withdrawn due to applicant's amendment filed 09/02/2004.
3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

or

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 1-28 are rejected under 35 U.S.C. § 102(e) as being anticipated by Stilp et al. (Stilp) patent no. 6,400,320.

5. As to claim 1, Stilp teaches the invention as claimed, including a method for obtaining real-time information associated with a telecommunication network, comprising:

enabling access to the information associated with the telecommunication network to one or more computer software programs stored in a storage device that is in communication with a computing system (col. 50 lines 29-45); and

enabling the one or more software programs to access the modifications on a real-time basis when any of the information associated with the telecommunication network is modified (col. col. 50 lines 29-45),

wherein the information associated with the telecommunications network comprises real-time variable information specific to a particular cell site within the telecommunications network (col. 8 lines 26-58; col. 19 lines 30-57).

6. As to claims 2-7, Stilp teaches storing the information associated with the telecommunication network in a database includes storing the information in a common database; enabling a user operating the computing system to modify data while maintaining the modified data secure from other users; at least a portion of the information associated with the telecommunication network is stored in a table that is shared by the one or more software programs; maintaining a log entry of access to the

database; maintaining a log entry includes maintaining a log entry of access to the database by one or more users; maintaining a log entry includes maintaining log entries of access to the database by one or more software programs; querying a database associated with the telecommunication network information; and determining the status of one or more variables associated with the telecommunication network; at least one variable is emergency information associated with the telecommunication network (col. 25 lines 65-67; col. 32 line 9 - col. 33 line 17).

7. As to claim 8, Stilp teaches executing the one or more computer programs on a plurality of computers interconnected as a network (figure 1A).

8. As to claims 9-10, Stilp teaches querying a database associated with the telecommunication network information; and determining the status of one or more variables associated with the telecommunication network; at least one variable is emergency information associated with the telecommunication network (col. 19 lines 30-45; col. 32 line 9 - col. 33 line 17).

9. Claims 11-28 have similar limitations as claims 1-10; therefore, they are rejected under the same rationale.

10. Applicant's arguments with respect to claims 1-28 have been considered but are deemed to be moot in view of the new grounds of rejection.

Art Unit: 2141

11. Applicant's amendment necessitated the new grounds of rejection. Accordingly, THIS ACTION IS MADE FINAL. See M.P.E.P. § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a).

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.

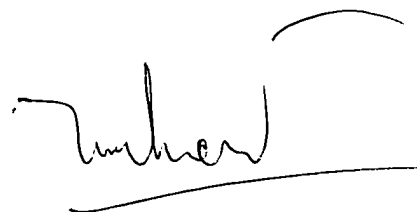

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Le H Luu whose telephone number is 571-272-3884. The examiner can normally be reached on 7:00am - 4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rupal Dharia can be reached on 571-272-3880. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
